

The NKG General Assembly 2014 – Introduction by the Scientific Committee

Jonas Ågren

The Scientific Committee

The program has been compiled by a Scientific Committee consisting of the following members:

- Jonas Ågren, Lantmäteriet, Sweden (Chair)
- Anna B.O. Jensen, Royal Institute of Technology, Sweden
- Jan Johansson, Chalmers University of Technology, Sweden
- Martin Lidberg, Lantmäteriet, Sweden
- Oddgeir Kristiansen, Norwegian Mapping Authority, Norway
- Matthew Simpson, Norwegian Mapping Authority, Norway
- Markku Poutanen, Geodetic Institute, Finland
- Pasi Häkli, Geodetic Institute, Finland
- Gudmundur Valsson, National Land Survey, Iceland
- Per Knudsen, Technical University of Denmark

Overview of the agenda

Monday	13:00-18:00	Introductory session
	18:00-	Ice breaker party
Tuesday	08:30-11:30	Geoid and Height Systems session
	11:35-15:00	Geodynamics session
	15:00-17:30	General poster session
	17:30-	Ad hoc meetings of e.g. working groups and projects (contact Jan Johansson to book a meeting room)
Wednesday	Reference frames, Positioning and Navigation – joint seminar of NKG, NNF and RNN	
	08:30-15:30	Presentations
	15:30-17:00	Panel discussion: “User needs for GNSS at high latitudes”
	19:00 -	Welcome drink, Dinner
Thursday	09:00-12:00	Session on Reference Frames and Geodetic Infrastructure
	13:00-15:00	Closing session

Practical remarks about the presentations

- There is only one poster session (on Tuesday), but the posters can be on display for the entire conference.
- It is encouraged that the posters are discussed also during coffee breaks, especially on Wednesday during the joint seminar (a few posters are only presented then).
- **Please keep the scheduled times!** Most presentations are 15 minutes. This means 12 minutes talk + 3 minutes questions and discussion. The session leaders are advised to be very strict here.
- Please upload your presentation during the preceding breaks.
- Do not use your own computer.

Proceedings

NKG has decided to try a new type of proceedings with two different parts:

1. A special issue in Journal of Geodetic Science (JGS) containing reviewed papers.
2. A more traditional Lantmäteriet report containing
 - Agenda
 - Participants and group photo,
 - National reports
 - Resolutions and elections
 - short one page summaries and un-reviewed papers.No PowerPoints or abstracts (we already have an abstract book and at least some little effort is required). However, for those papers that are published in JGS we might include title and abstract with a link to JGS.

Deadline for both parts is **November 30, 2014**.

More information will follow after the conference (by e-mail and at the <http://www.lantmateriet.se/nkg2014>)

The PowerPoint presentations will be made available at the NKG website.
