

Welcome to NKG General Assembly

Thorbjørn Nielsen, Head of dept. of Geospatial reference at SDFI

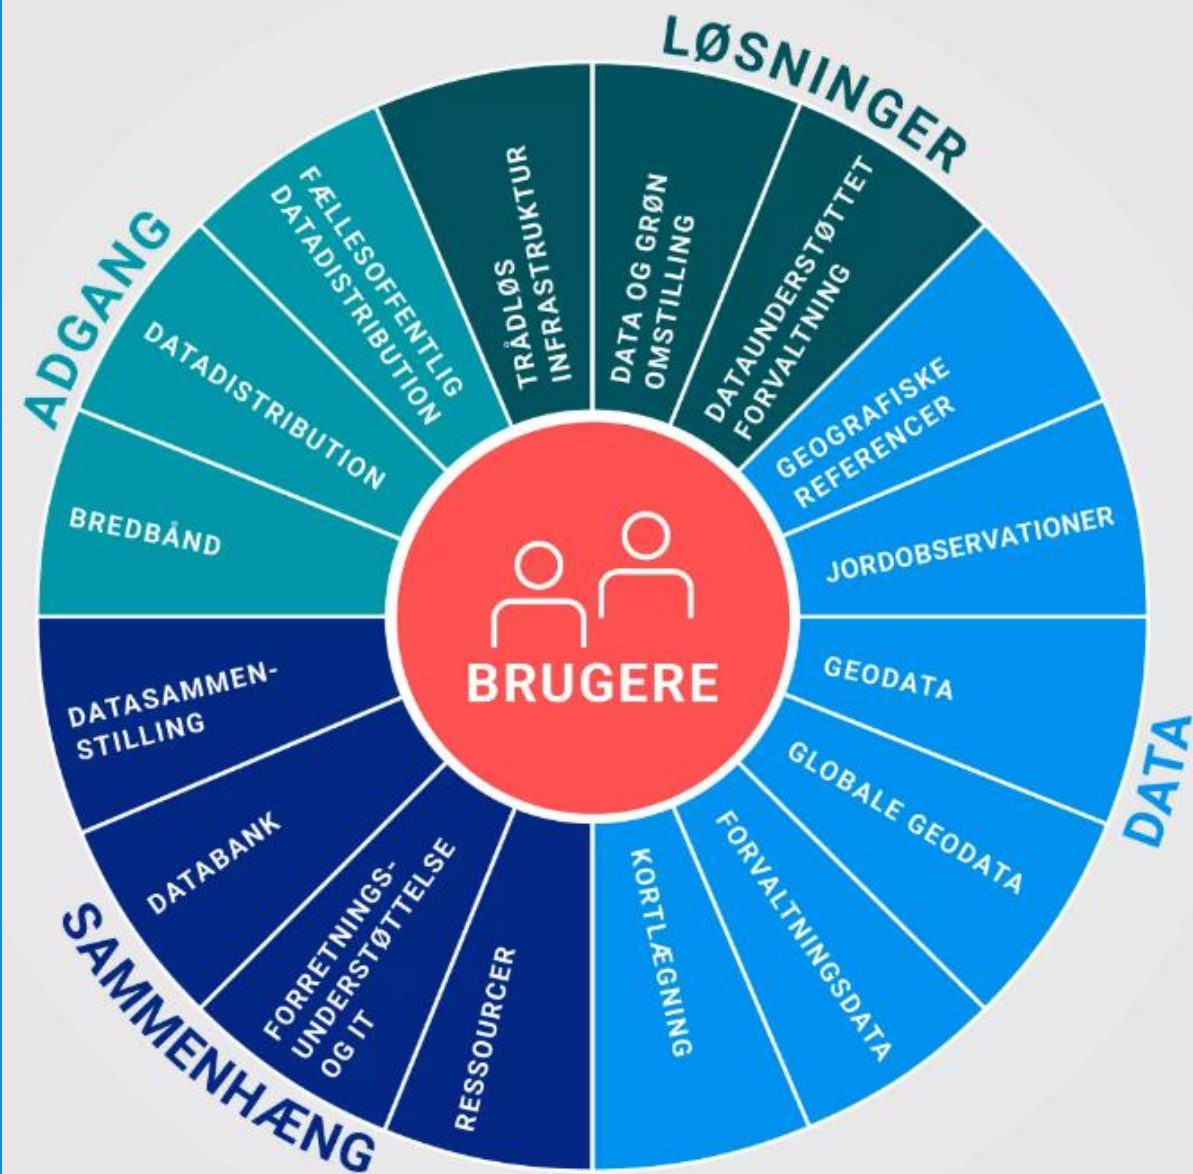

Agency for Data Supply
and Infrastructure

SDFI

- Agency for Data Supply and Infrastructure
- ~300 colleagues, 16 departments
- New: Tele infrastructure.

- What we are: Data! Coherence! Access! Solutions!
- What we are not: Cadastre and nautical charts.

Geographical References

SDFI

Authority on geodesy

- GNSS Reference stations in Denmark and Greenland. Test platform (TAPAS) in Aarhus.
- Maintaining benchmarks
- Maintaining exterior borders

Partners:

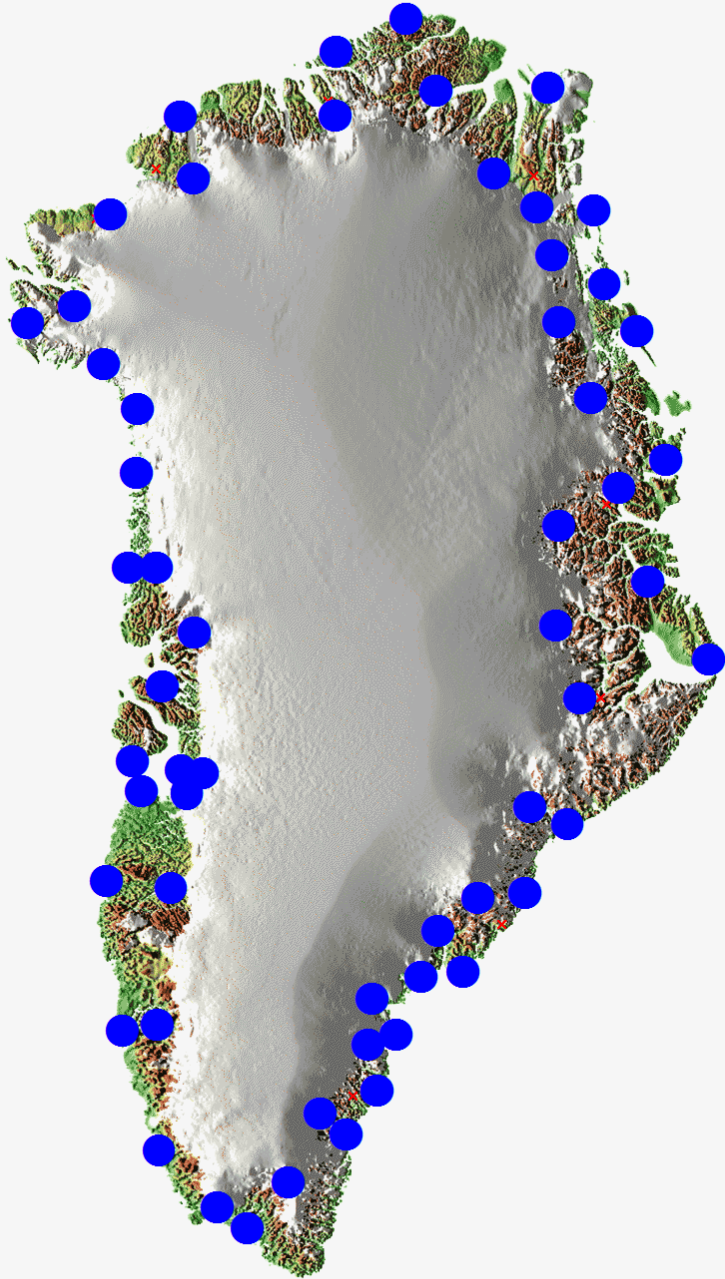

- DTU Space
- NKG

What's hot right now?

- New national IT strategy plots the path for a national plan on mobility data
 - Recognising the importance of reliable data on mobility, including positioning technology in preparation for a society relying on autonomous systems, a national plan on mobility data is undertaken. SDFI has been tasked with this work.
 - Two offices (tele communication) from ministry of commerce has moved to SDFI.
- Climate adaptation projects worth €6-10 BN* sets a demand for a modern geodetic infrastructure
 - Moving towards GNSS based levelling.

The importance of NKG

What we do in NKG really matters! Geodesy and climate science are intertwined.

- Long time series is basis for predictions
- Predictions call for action
- Action is dependent on good geodesy

- Let's get to work!
